

# H.P.B. Safe-Sense™ Electronic Fence

## ■ Introduction

H.P.B. Safe-Sense™ - Electronic Fence can detect 50 moving objectives in the same time with real-time visual algorithm and recognize the nearest object distance as reference point. H.P.B. intelligent safe-sense module does not need additional image calculation effort and its revolutionary light pattern can enhance the objective detection rate in night, worse weather and lighting environment.

## ■ Key feature

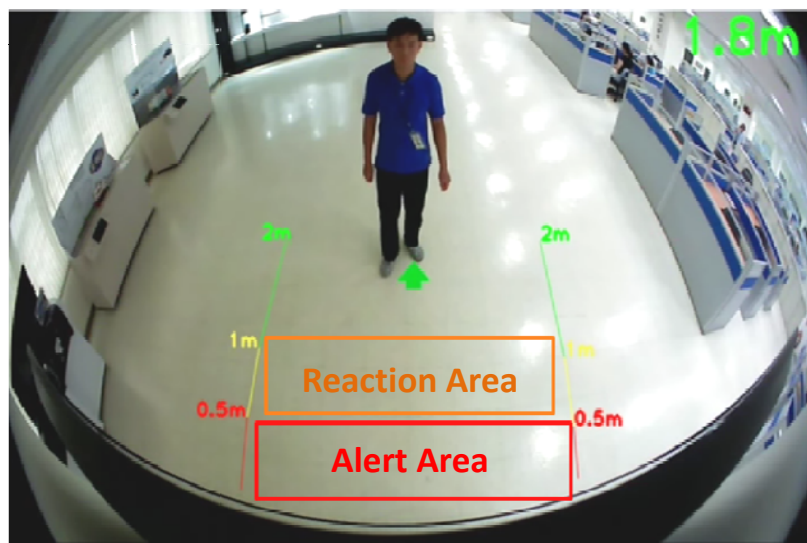

- ◆ Distance displayed by one camera
- ◆ Enhance detection rate with light pattern
- ◆ Multi-Object tracking and distance displayed on the nearest one
- ◆ Alert in designated distance and send pictures to house owner's cellphone
- ◆ Support 50 multi-object detection

## ■ Key Specification

- ◆ Moving Object Detection
- ◆ Minimum Dimension of Object:  
30\*30\*30 cm<sup>3</sup>
- ◆ Response time : < 0.2 sec.
- ◆ Camera FOV: 180°
- ◆ Support HD/FHD
- ◆ Detection Accuracy: 0.1M

Enhance detection rate with light pattern added

Detect moving objects and alert in designated distance
